

# RIVERSIDE.IO

Actively growing a coworking community in Riverside.

<http://riverside.io>

# Problem

Riverside lacks a central location for its  
burgeoning startup scene.

# Opportunity

Startups drive growth. They attract entrepreneurs, highly skilled workers, and even create brand new industries.

# Solution

A Coworking space.

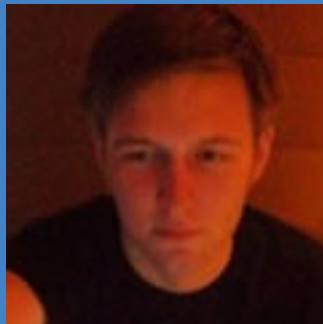

# Solution continued

Coworking is, at its core, a shared office space. You go there to work on your project, meet with clients, and build your startup.

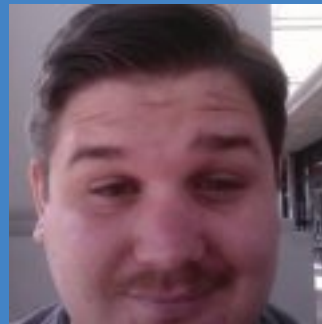

It **becomes** a dynamic place where teams are formed, new startups are built, businesses are created, inventions are realized, young tech talent is nurtured, and friendships happen.

**You Here**

# Locations

A long list of possible locations have already been found. The list continues to grow.

Goals:

700-1,000/sq ft in Beautiful Downtown Riverside

# Community

There exists a large pool of potential members to support the Coworking space.

- ~100 Members of StartupE.com
- ~80 Members of RiversideJS.org
- ~5 Colleges

We can make this a reality with 15 members. You can be part of that.

# Get Involved

We need people to help us accelerate the process of shaping and forming Riverside's first coworking space!

Becoming a committed member is the single best way to do this. Sponsoring Riverside.io's endeavor is the second best.

Thanks. Go to <http://riverside.io> and Join the Mailing List.
